

ATLAS IP HOLDINGS LLC (Indiana)

Exclusive IP Licensing + Monetization Platform
Owner keeps 100% ownership. Atlas earns 20% on monetization.

What Atlas is

Atlas is an IP holding and licensing infrastructure company. We help independent inventors and IP owners package, verify, and monetize IP assets through licensing and strategic deals — while the Owner retains full ownership of the IP.

What Atlas does (the work)

1) Intake + Verification

- Confirm chain-of-title / ownership control
- Identify any prior licenses, liens, or conflicts
- Build a clean “asset record” for institutional-grade deal execution

2) Packaging

- Create the licensing packet (plain-English description, use cases, diagrams, evidence)
- Build target lists (companies + segments)
- Prepare deal structures (license, JV, sale, hybrid)

3) Outreach + Deal Execution (Exclusive)

- Contact and negotiate with prospective licensees
- Coordinate term sheets, drafts, redlines, and closing
- Maintain deal files, renewal dates, and payment schedules

4) Collections + Reporting

- Collect licensing revenue (default pay-to-Atlas)
- Apply the fee waterfall transparently
- Monthly statements + payouts

How you get paid (waterfall)

For each payment received from a licensee:

1. taxes (if applicable)
2. approved expenses (only if pre-approved)
- 3. Atlas Fee (20% of gross receipts)**
- 4. remainder = Net to Owner**

Payouts are issued **monthly** (within **15 days after month-end**) with a revenue statement.

How the relationship is structured

Atlas uses a simple institutional document stack:

- **NDA** (optional but recommended)
- **IP Intake Form** (asset + ownership details)
- **Master IP Participation Agreement (Exclusive)**
 - Owner retains ownership
 - Atlas runs licensing and monetization
 - Non-circumvention + deal attribution protects the platform
 - Tail period protects active deal work

What Atlas is NOT

- Not a patent buyer by default
- Not a law firm
- Not a guarantee of outcome
- Not an IP assignment grab

What we need from you (fast-track list)

- Patent/application numbers or IP proof
- Any assignments / co-inventor details
- Prior licenses or restrictions (if any)
- Supporting files: deck, drawings, repo, demo, photos, test data
- Target industries (optional)
